playstation home but with the quality of a bad indie game and a community full of roleplayers and single lonely men.. waste of time, its like the main part of the game is missing and all thats left is an arcade game of shooting bubbles, very boring, mabee its faulty.. Loved it! It was awesome to see the story of Jett and Bolt play out after playing through the original SC2VN. I this this a great prequel and really enjoyed all of the characters. Lots of funny moments as well, and the interactive game scenes were a cool addition! Great job!. It's probably alright, just get the season pass or something idk don't ask me I didn't play it. At the time of this review, I'm only 4 hours in, but I think it is a decent game. For me, I work in the industry, and I know it is pretty complex, which explains why there isn't good simulators for it as opposed to aviation, rail, or even retail industry. What I found great about this game is even in its simplicity and cartoony style; it does capture the following:

- The oil business is about optimizing processing.
- Optimization is not a simple accomplishment, as the measurement of each processing segment doesn't match with adjacent pieces.
- It not only includes exploration, development, processing, storage, and transport logistics, but marketing, mainenance, and safety.
- When played fully, you need to get license to operate in different countries, you have to develop those regions differently, and the regions are not cookie cutter to other regions.
- Contract management and ullage is well done.
- I haven't been successful enough to develop the corporate offices yet, but from what I've seen of the build options, I think that was well considered, especially as a separate and segregated piece of regional development and processing, because that's how it is the major oil companies.

There's some cons (graphic artifacts, some unnecessary menu clicking, maybe a bit too cartoony for the subject) about it as a game, and it does look like it could use a little more polish. And if the developer is considering an updated version in the future (thinking new paid release), then competition would be nice, even if it is just shown in the marketing aspects (something that explains why prices go up and down). But the cons are superficial in my view, because the game plays well and every other attempt I've seen for simulating the oil industry is far worse and completely unplayable.

If you want to understand something about the business of oil, then this is the best game I think you can find.

If you are just looking for another strategy/city builder game to play, then this might not be your best choice.. It has been more than 1 year since I played this game, i just realized that i need to post a comment for this game.

Developing a text based adventure game has been one of my dreams and this game triggered that ambition in me. I owe this game that. Now i know what to do.

Cheers.. Bad graphics and gameplay quit the game within 2 minutes. I LOVE this game. With the latest update that slows your oxygen loss, the game has achieved a wonderful balance. It's not too easy, but also not punishingly hard either. When I first bought this game, I died something like 10 times in the first 2 hours of play. Not enough oxygen, impossible to find seeds for planting both oxygen and nutrition plants, no energy canisters to be found... needless to say it was VERY difficult (for me). However, with the latest update, things are wonderful! I get a strong sense of accomplishment, and a craving to revisit the world. The oxygen levels are more balanced, and you can progress at a fair pace. I'm a big fan of Conductor, and I'm really excited to see where this game goes!

EDITED

I originally posted that there was a glitch with the arm quit button not working and ruining saves. Within a day of posting it, the devs had responded, created a hotfix, and patched it. Amazing devs! Get this game!. The game has some balance issues. You will also notice that the difficulty levels are hardly accurate. After a while gameplay is pretty routine. No I'm not going to tell you, that would make the game totally worthless. As far as changes, let players position pieces before battles start. Some pieces are worthless, try to find some value for them. Same goes for nationalities, come up with deeper, more unique characteristics. Take out the part that skips battles. I know it's used to balance a player who does well but that takes away from a good player. I'm vague on purpose, you're not paying me. figure it out yourself.. Very good.You can make your own team,Play with friends,BEST CO-OP FOOTBAL GAME AT THE MOMENT!

this game is a masterpiece. Some might say it is crazy to pay for something that's on YouTube for free, but this is still some of the best web shows I have ever seen. I still laugh and cry when I watch it. Been playing this game for almost an hour now, and let me tell you how fast-paced this game is.

I definitely recommend it for anyone out there who digs reflex-based games or is subscribed to Vr/sweatpalms.

It's definitely repetitive, but that's a good thing in this case. You're on a fixed map that keeps getting filled with enemies and bonuses, and it's up to you to beat back the horde and collect as many points as you can.

To tell the truth, I bought this game because it only had one review, and it was negative. I had to give it a fair chance, and what do you know? It kicks\u2665\u2665\u2665\u2665 I put it right next to Agar.io, Slither.io, and Unpossible. (Also very gratifying since I made the #3 spot on the leaderboard in under an hour hahaha suck it...). The game is good. But not \$15 good. This game deserves more credit.

Cons:

Multiplayer only.

Random desyncs.

Poorly balanced pieces.

However the game just came out so I'll give it a chance to update and fix these issues.

Pros:

Great arena.

Amazing mechanics.

Lots of potential.

People should really play this game more.
